

## ENERGY PROJECTS

Our briefing dated 11 March 2021 focuses on Transportation, Property Construction, Investment and Policy Projects in the GBA. Indeed projects are the key drivers for the GBA's future. Competition is good for efficiency; yet competition without a detailed GBA **development roadmap** will surely end in tears as before: bicycle sharing resulted in dumping bicycles everywhere with companies facing bankruptcy. In short, tracking projects is vital for the destiny of GBA. We begin this time with the Energy Projects.

## EDUCATION - THE UPSKILL LINCHPIN

**Talent acquisition** via education sustains the GBA growth engine. Not only the Hong Kong government, but various university campuses all indicate their intention to set up Twin Universities there. If this actual happens, then the GBA will become the most competitive area in China.
